

Enrolling NOW

for an Innovative Quality Improvement Program that Brings QI to Your Door!

American Academy of Pediatrics 
DEDICATED TO THE HEALTH OF ALL CHILDREN™
Ohio Chapter

Clear up the confusion over meningococcal vaccination and learn strategies to increase attendance and quality of adolescent well visits with the new Ohio QI2U – MenB program.

Goal: To increase attendance at, and the quality of, adolescent well visits and improve the rate of administration of the meningococcal serogroup B (MenB) vaccination. The program will focus on system-based changes to promote attendance at well visits by providing patient reminders, reducing barriers and improving practice culture to allow the administration of the meningococcal serogroup B vaccination.

What does Ohio QI2U - Men B mean for you?

- **Personalized** program training at your practice location by a nationally-trained practice coach
- Monthly **one-on-one** calls or meetings with the practice coach for continued guidance and improvement strategies
- Learn **best practices and lessons** from a cohort of other participating practices
- **Assistance with data entry** if desired
- **MOC Part IV** credit for eligible physicians
- **Office stipend** to offset staff time
- Invitation to a summit at the conclusion of the collaborative to **share successes and strategies for sustainability**

Timeline: Rolling enrollment for the 9-month collaborative begins January 2017

Who can participate?

Practices that immunize 16-23 year-olds, including pediatricians, family physicians and adolescent medicine specialists.

Questions? Contact Melanie Farkas at mfarkas@ohioaap.org or at (614) 846-6258.
