Not all juices are created equal.

These are some examples of 100% juices and the amount of sugar in each juice.

All these juices are authorized Ohio WIC juices. You can buy either the brand names listed, or store brands, as long as they are 100% juice.

It is easy for kids to drink a lot of juice, but too much juice can lead to poor nutrition, tooth decay, and unhealthy weight gain.

Juice should NOT replace whole fruits or other healthy beverages like low-fat milk or water. Choose juice options wisely!

Juice is just one way for your child to get their fruits and veggies each day. If your child drinks juice they should only have:

- 100% juice
- 4 ounces per day for 2-3 year olds
- 4-6 ounces per day for 4-8 year olds
- 8-12 ounces per day for 8-18 year olds

Some juices have a serving of fruit and of vegetables, like:

- Mott's Medleys
- V8 Fusion
- Apple & Eve Fruitables
