

Ohio AAP Annual Meeting

Jerry Tiberio, FAAP
District V Vice-Chairperson, AAP

American Academy of Pediatrics
DEDICATED TO THE HEALTH OF ALL CHILDREN®

SO MUCH WINNING!

BUT MORE WORK AHEAD

- Gun Violence Prevention
- Immigrant Children and Families
- Opioids/SUD
- ACA Market Stabilization
- All-Hazards Preparedness Improvement
- Get Out the Vote

Gun violence Prevention

- Common sense gun safety legislation

Immigrant Children and Families

- Family separation policies
- Placing Children in Detention

Opioids/SUD

- NAS Crisis

All-Hazards Preparedness Improvement Act

- Improve the nation's public health and medical preparedness
- Response capabilities for emergencies

The Vote

- National election is the last day of the NCE

CHILD HEALTH VICTORIES RECENTLY ACHIEVED

- A. Protected families against multiple bills to undermine Medicaid**
 - B. Extended CHIP funding for 10 years**
 - C. Extended MIECHV funding**
 - D. Passed Family-First bipartisan child welfare reform legislation**
 - E. \$3 billion increase for NIH**
- AND MORE!!**

Annual Legislative Conference

FAAPS Take the Capitol

- All 50 States/DC and Puerto Rico represented
- Every Senate office visited!
- Main messages to Congress:
 - Provide \$50 million to CDC for public health research into firearm safety and injury prevention;
 - Support minimum purchase age of 21 for semiautomatic assault weapons and high-capacity magazines
 - Ban semiautomatic assault weapons

AAP Ohio Delegation

Letter: What does a public health approach to guns look like?

MARCH 31, 2018, 7:00 AM

Children and teens are raising their voices and marching for their lives. As pediatricians, we are right there with them.

Gun violence has become like a contagious disease: hard to contain, making people fearful. What does a public health approach to guns look like? It looks much like the extraordinarily successful approach used with automobiles: regulating and limiting access to those law-abiding and capable, while working continuously to make them safer.

Chicago Tribune

and other require

since with gun in ban require that loaded gun in empower se a danger

f the causes effective,

who are not d teachers iffERENCE,

rothy,

To the Editor:

Re "[Dubious Theories on Shooting in Florida Find an Audience](#)" (news article, Feb. 21): As pediatricians, who devote our careers to taking care of children, we are appalled by the conspiracy theories, vitriol and slander being directed at the teenage student survivors of the shooting in Parkland, Fla

The New York Times

The audacity of some prominent figures in the media and politics to instead further attack these children with baseless accusations is unconscionable. Since the adults are not modeling good behavior, we turn to the students who are.

COLLEEN KRAFT, DAVID SCHONFELD
ITASCA, ILL.

We've raised our voices as child health experts to help frame the conversation around gun violence as a public health threat to children. This includes advocating for research into the causes and solutions to the gun violence epidemic.

We're pursuing policy change and advancing meaningful gun safety legislation at the local, state and federal levels.

And we're working to protect the mental health needs of all children who are exposed to the constant threat of gun violence.

HEALTH OF ALL CHILDREN

THE OFFICIAL NEWSMAGAZINE OF THE AMERICAN ACADEMY OF PEDIATRICS

AAP News

Breaking News • March 16, 2018 • www.aapnews.org

**AAP Launches The American Academy
of Pediatrics Gun Safety and Injury
Prevention Research Initiative**

Setting Standards and Best Practices

AAP published 60+ child health policies and improved timeliness of publication

Pending Policies

A. Teen Driving

B. Ensuring Comprehensive care and support for transgender- and gender-diverse children

C. Marijuana use during pregnancy and breast feeding: Implications for neonatal and childhood outcomes.

Recently Released AAP Policies Garnered Media Interest

- A. Adolescent and Young Adult Tattooing, Piercing, and Scarification (1,100 media hits)
- B. Guidelines for Adolescent Depression in Primary Care (first update in 10 years)
- C. Advocacy for Improving Nutrition in the First 1,000 Days to Support Childhood Development and Adult Health (254 media placements)
- D. Influenza Recommendations
(more than 500 media placements)

Since 2001 Incidence of NAS Has

- A. Doubled
- B. Slightly decreased
- C. Increased nearly 300 percent
- D. Increased nearly 400 percent
- E. Increased nearly 600 percent

Incidence of NAS in the US, 2000-2012

Patrick SW, et. al. Neonatal Abstinence Syndrome and Associated Healthcare Expenditures – United States, 2000-2009. *JAMA*. 2012 May 9;307(18):1934-40.

Patrick SW, Davis MM, Lehman CU, Cooper WO. Increasing incidence and geographic distribution of neonatal abstinence syndrome: United States 2009 to 2012. *J Perinatol*. Apr 30 2015.

NAS

- Increased 400% nationally
- 1.2 per 1,000 hospital births in 2000 to 5.8 in 2012
- Approximately every fifteen minutes with NAS
- Prosecuting and incarcerating pregnant women with substance-use disorders is a punitive approach...the Academy published:
 - a) opioid addiction is an illness
 - b) jailing mothers has no proven benefits; may lead to avoidance of prenatal care
- Punitive to both mother and baby

AAP's Multi-Pronged Approach to E-Cigarettes

**E-cigarettes:
A Threat to Health**

The American Academy of Pediatrics believes e-cigarettes and other electronic nicotine delivery systems are a significant danger to the health of children and nonsmokers. For more information, visit bitly.com/AAPpolicy.

-  More than 7,700 flavors of e-cigarettes exist, including fruit and sweet flavors that appeal to children and youth.
-  It is not safe to use e-cigarettes near children: There are cancer-causing chemicals in the exhaled e-cigarette vapor.
-  Minors can easily purchase e-cigarettes online, or - in some states - at convenience stores.
-  Less than half a teaspoon of a nicotine-containing e-cigarette solution can be fatal to the average toddler.
-  Ads for e-cigarettes are targeting adolescents and appear on TV, radio, and online.
-  Most e-cigarettes contain nicotine. Nicotine is a highly addictive, harmful drug.

American Academy of Pediatrics
Julius B. Richmond
Center of Excellence
www.richmondcenter.org

- Educate children, parents, public about harmful effects of e-cigarettes on developing brains
- Urge strong, immediate regulatory action to move ahead with review of dangers posed before they come to market
- Give pediatricians information/tools to discourage patients/families from adopting this habit

Five-Year Strategic Plan and Agenda for Children

American Academy of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN®

Five-Year Strategic Plan Goals

- A. Strengthen AAP's impact on child health through policy, advocacy and education
- B. Enrich member value and engagement
- C. Broaden, diversify pathways for general pediatricians, pediatric surgical subspecialists and trainees to exercise leadership within AAP and public sphere
- D. Enhance Academy's communication with members and stakeholders
- E. Support strong two-way relationships, interactions and leadership development between AAP and chapters

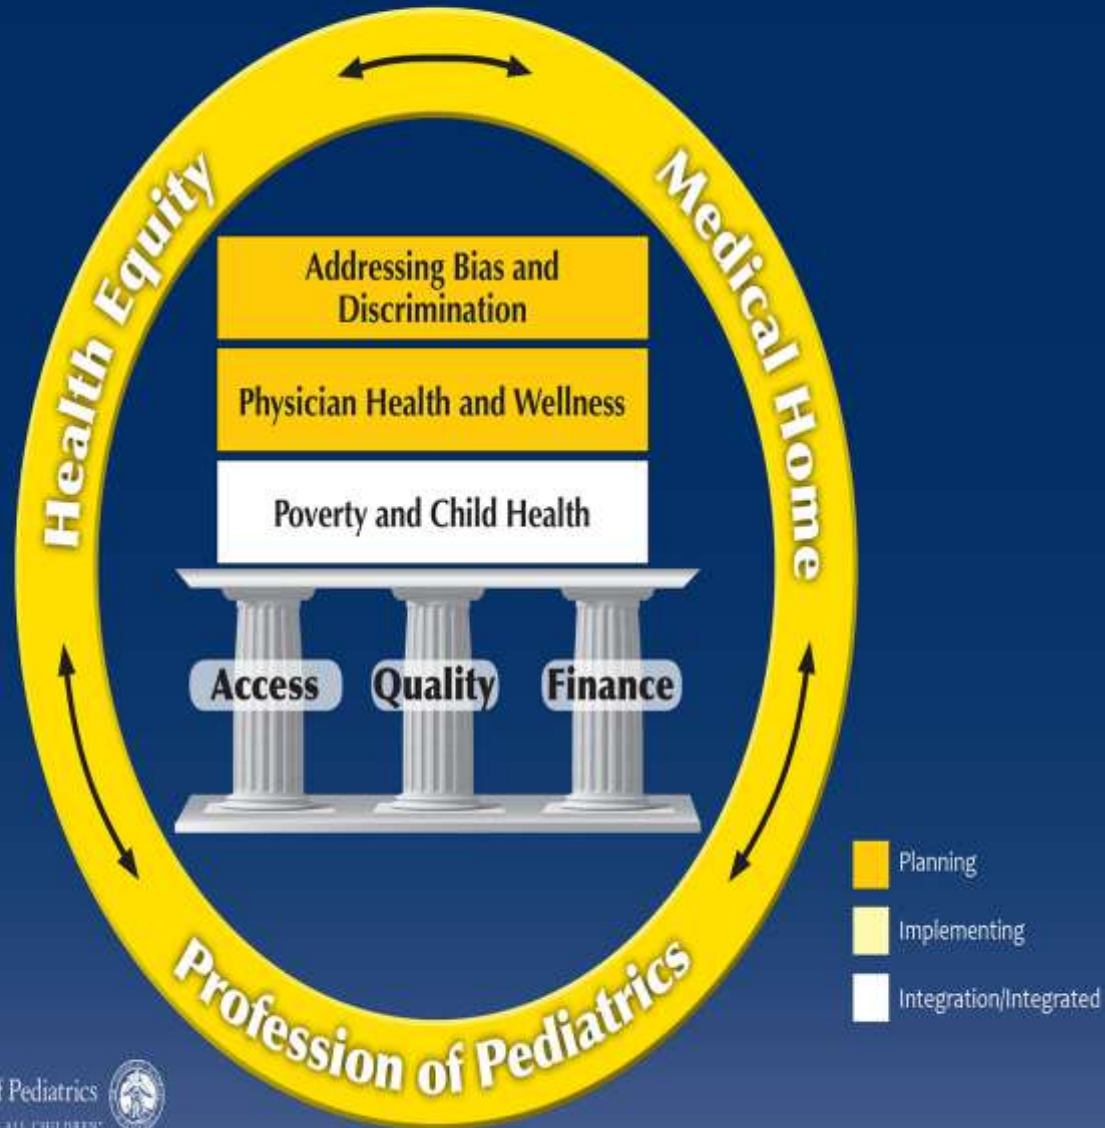

Progress-to-Date Highlights

1. Proposed three new BOD seats for at-large, medical subspecialist and surgical subspecialist from committees, councils and sections
2. DTI leveraging user-friendly digital products
3. 2018 District Meetings feature chapter management workshops on fundraising, grants management and leveraging social media
4. Institutional memberships in place in 11 academic institutions
5. New HQ and technology offers more access to CME/enables enhanced response to emerging health crises

AAP Agenda for Children 2017-2018

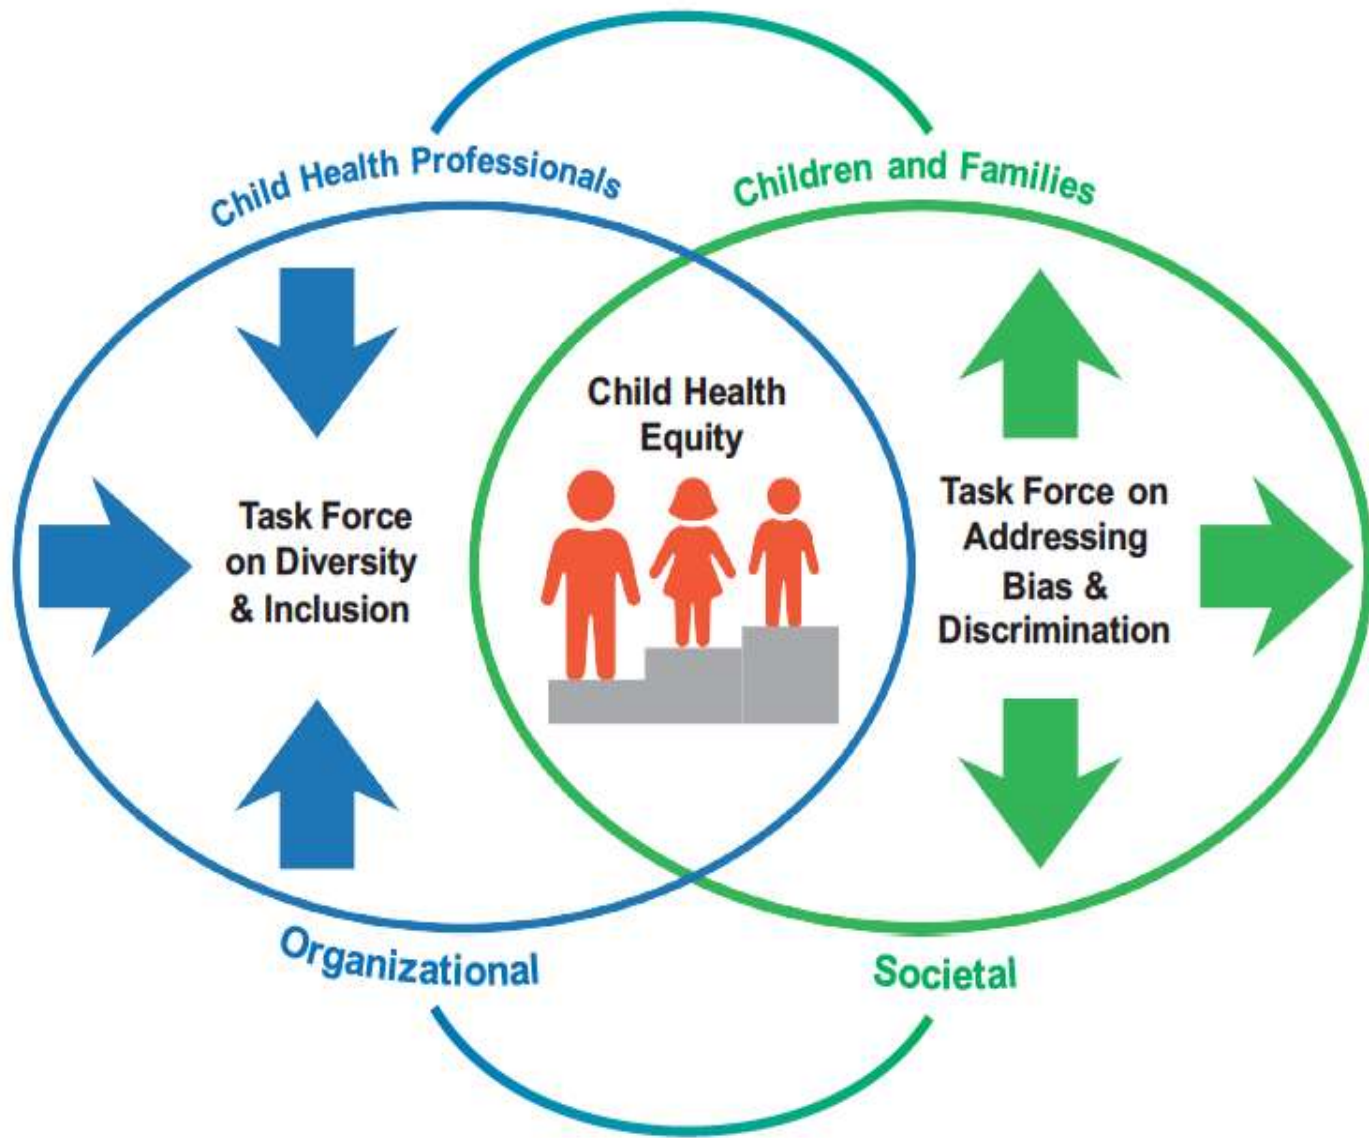

DEDICATED TO THE HEALTH OF ALL CHILDREN™

Physician Health and Wellness

- PLACES Study identified three strategies to reduce burnout:
 - Reduce administrative burdens
 - Improve workforce efficiencies
 - Offer more flexible schedules
- AAP lending pediatric perspective to NAM study of how work/learning environments adversely affects clinician wellness
- FOPO Physician Wellness Workgroup exploring how to adapt NAM model to pediatric clinicians
- Women's Wellness through Equity and Leadership Grant
