4 in 10 children are exposed to
secondhand tobacco smoke in
their home.

The **Smoke Free Families Learning Collaborative** offers pediatric primary care providers training and resources in screening, completing the 5As of smoking cessation, and referral to the Ohio Quit Line for infants age 0-1 year old during well child visits. Practices in Wave 1 showed 47% reduction in in-home smoke exposure for infants participating in the program. Receive up to \$1000 in resources and sleep sacks to help promote safety for your patients.

Format: Learning Collaborative with in-person visits and hands-on coaching from QI staff, NO DATA collection, minimal lift for provider; 25 MOC Part IV Points
Dates: November 19 – Aug 20
Contact: Kristen Fluitt, MS
kfluitt@ohioaap.org, 614-846-6258

The chief complaint of providers who are not administering vision screening to patients ages 3-6 is lack of reimbursement.

The **Preschool Vision Screening QI project** is designed to help Medicaid primary health care practice sites improve vision screening practices, reduce disparities in receipt of preventive vision services, and guide uniform best practices in children's vision and eye health.

Format: Learning Collaborative with in-person visits and hands-on coaching from QI staff, 25 MOC IV Points
Dates: December 19 – June 20

13.1% of 2-4 year old WIC participants have obesity.

The **Parenting at Mealtimes and Playtime Program** provides healthy weight, activity and nutrition education focused on birth –5 year olds. Practice coaching places an emphasis on patient/physician interaction to promote culturally diverse and compassionate care. Pediatricians who participated in this program nearly tripled frequency of goal setting with families when an obesity risk factor was present.

Format: Practice coaching-assistance with chart data, in-house training from QI staff, minimal lift for provider
Dates: October 19 – May 20
Contact: Renee Dickman, MS
rdickman@ohioaap.org, 614-846-6258

ONLY
40%

of Ohio's Medicaid children get the two required lead screenings.

Thousands of Ohio's children have elevated blood lead levels that require public health involvement.

The **Lead Screening QI Program** is a partnership with the Ohio Department of Health to develop and implement a comprehensive lead testing training program for Ohio's pediatricians.

Format: MOC Part II Regional Trainings and MOC Part IV QI Program
Dates: Coming Soon!
Contact: Renee Dickman, MS

1 in 3 homes with kids has a gun, and nearly 1.7 million children's homes has a loaded, unlocked gun. Accidental shootings by toddlers occurred weekly in 2015, and even more often in 2016.

Less than 20% of pediatric providers regularly discuss firearm safety with patients. The **Store It Safe Firearm Safety Learning Collaborative** launches this fall to engage practices in a facilitated QI project, providing education and tools for improved pediatrician discussions of firearm safety and storage with families of 2 to five year-olds. Resources include training, handouts, data evaluation and lock boxes at select practices.

Format: Practice coaching-assistance with chart data, in-house training from QI staff, minimal lift for provider; 25 MOC IV Points
Dates: December 19 – May 20

HIGH SCHOOL STUDENTS reported in 2018 that they have used e-cigarettes in the past 30 days.

The **Regional Adolescent Vaping Trainings**, developed in partnership with CVS Health, will train healthcare providers in how to screen adolescents for e-cigarette use and discuss intervention tactics. Participants will receive tools and educational resources.

Format: MOC II Regional Trainings
Dates: October 11, 2019 • Northeast Ohio (Akron)
October 18, 2019 • Central Ohio (Columbus)
November 13, 2019 • Northwest Ohio (Toledo)
November 15, 2019 • Southwest Ohio (Dayton)

About 1 in 5 children ages 5 to 11 have at least one untreated decayed tooth. Additionally, students who start kindergarten behind in literacy skills form the largest group of dropouts, with less than 12% attending a four-year university.

The **Brush, Book, and Bed Program** for early literacy training aims to address both of these concerns by providing practices with resources and guidance that focus on oral health and the importance of a healthy nighttime routine. Practices will receive books and toothbrushes to share with patients.

Format: Learning Collaborative, MOC II Regional Trainings, 25 MOC Part IV Points
Dates: December 19 – May 20
