Learning Objectives: At the close of this activity the learner will be to…

• Explain the dangers and health crisis of e-cigarette use with adolescents and families
• Implement prevention strategies and treatment resources of e-cigarette use among adolescents.
• Identify Lead-Exposed Children and Improve their Health Outcomes
• Increase physician and mid-level providers’ ability to provide anticipatory guidance
• Communicate and provide resources to families to improve health outcomes.

Target Audience: Pediatric primary care, sub-specialists, hospitalists, general physicians, nurses, residents, medical students, psychiatrists, psychologists, law makers, community members, social workers, allied health and all other stakeholders in the safety and health of Ohio’s children.

Course Description: This activity is designed to provide health practitioners with the most recent curriculum in lead and vaping prevention. Practitioners and public health professionals will be given tools to help pediatrics and adolescent patients grow to be healthy, resilient adults.

Accreditation Statement
The Ohio Chapter, American Academy of Pediatrics (Ohio AAP) is accredited by the Ohio State Medical Association to provide continuing medical education for physicians. The Ohio AAP designates this live activity for a maximum of 4.5 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. Successful completion of this CME activity, which includes participation in the activity, with individual assessments of the participant and feedback to the participant, enables the participant to earn 5 (nine) MOC point in the American Board of Pediatrics’ (ABP) Maintenance of Certification (MOC) program. It is the CME activity provider’s responsibility to submit participant completion information to ACCME for the purpose of granting ABP MOC credit. MOC Part II credit will be entered into the CME data portal entitled PARS and will be shared electronically with the ABP within 30 days of the activity date.

Did you Know?

40% of Ohio’s Medicaid children have not been screened for lead.

Nicotine rewire your brain, affecting learning, memory, focus and emotions.

Studies have shown that vaping can exacerbate the symptoms of COVID-19.
