

BE PREPARED FOR FLU SEASON!

#SafePedsHealthyKids

Now more than ever it is important you protect yourself by receiving the flu vaccine! The CDC and Ohio Department of Health recommend flu vaccinations as it can help reduce the impact of respiratory illnesses on the population as well as lessen unnecessary burdens on the healthcare system during the COVID-19 pandemic.

WHO SHOULD GET A FLU VACCINE?

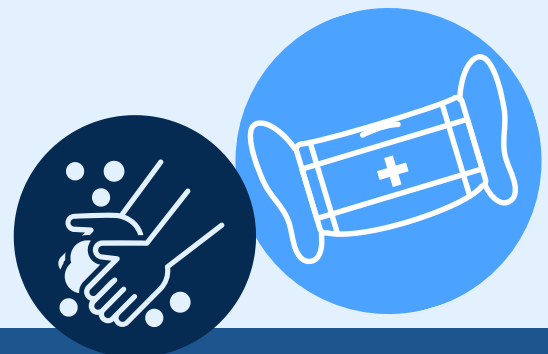

Any person 6 months of age and older! This includes people at risk for serious complications including:

- Infants and young children
- Pregnant women
- Adults age 65 years and older

Yes, your pediatrician has implemented safety measures to ensure safe delivery including:

- Screening patients for symptoms of COVID-19
- Implementing face mask policies for adults and children over 2 years of age
- Ensuring patients practice proper hand hygiene and cough etiquette

IS IT SAFE TO RECEIVE THE FLU VACCINE DURING COVID-19?
