

YOU DON'T KNOW IF YOU DON'T ASK THE IMPORTANCE OF PEDIATRIC SCREENING

DEVELOPMENTAL MONITORING

The process of recognizing children who might be at risk for developmental delays. Per AAP, should be a part of every well-child preventive care visit.

VS.

DEVELOPMENTAL SCREENING

AAP recommends developmental and behavioral screening for all children during regular well-child visits at these ages:

- 9 months
- 18 months
- 30 months

Autism screening specifically, is recommended at these ages:

- 18 months
- 24 months
