More than 67% of homes in Ohio were built before 1980 and likely contain lead-based paint. With only 41% of children on Medicaid tested for elevated blood lead levels, many children are being missed.

The CDC lowered the blood lead reference value to 3.5 μg/dL increasing the number of children at risk for lead poisoning in Ohio.

ADHD affects about 9.4% of US children ages 2-17, including 2.4% of children 2-5 years and 4-12% of school-aged children.

Ohio AAP

**2024 Spring Meeting Learning Objectives**

- Utilize lead-focused resources from the Ohio Department of Health, including policies and abatement programs to enhance communication with caregivers.
- Improve discussions with caregivers on the primary prevention of lead poisoning, elevated blood lead levels, testing, Ohio AAP resources, and treatment through case studies.
- Curate talking points and communication strategies to address lead prevention care with the leadership in your system, school, clinic or point of care.
- Identify young patients (2-6 years of age) presenting with behavioral challenges who require further evaluation.
- Differentiate among the presentation of ADHD, anxiety, oppositional defiant disorder or other neurodevelopmental disorders in children aged two to six years.
- List parenting techniques that can be employed to help manage common behavioral challenges in children aged two to six years.

**CME/MOC Statements**

The Ohio Chapter, American Academy of Pediatrics (Ohio AAP) is accredited by the Ohio State Medical Association to provide continuing medical education for physicians. The Ohio AAP designates this live activity for a maximum of 3 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity. Successful completion of this CME activity, which includes participation in the activity, with individual assessments of the participant and feedback to the participant, enables the participant to earn 3 MOC points in the American Board of Pediatrics’ (ABP) Maintenance of Certification (MOC) program. It is the CME activity provider’s responsibility to submit participant completion information to ACCME for the purpose of granting ABP MOC credit. MOC Part II credit will be entered into the CME data portal entitled PARS and will be shared electronically with the ABP within 30 days of the activity date.

**Course Description:** This activity is designed to provide health practitioners with the most recent curriculum and strategies aimed at increasing provider confidence in advocacy, mental health, infant feeding, dermatology, reproductive health, anxiety, sports medicine, trauma informed care and disordered eating.
